AIMS AND SCOPE

Quaternary Science Reviews caters for all aspects of Quaternary Science, and includes, for example, geology, geomorphology, geography, archaeology, soil science, palaeobotany, palaeontology, palaeoclimatology and the full range of applicable dating methods.

The dividing line between what constitutes the review paper and one which contains new original data is not easy to establish, so QSR also publishes papers with new data especially if these perform a review function.

All the Quaternary Sciences are changing rapidly and subject to re-evaluation as the pace of discovery quickens; thus the eclectic and comprehensive role of *Quaternary Science Reviews* keeps readers abreast of the wider issues relating to new developments in the field.

This journal and the individual contributions contained in it are protected under copyright by Elsevier Ltd. and the following terms and conditions apply to their use:

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier via their homepage (<http://elsevier.com>) by selecting "Customer support" and then "Permissions". Alternatively you can send an e-mail to: permissions@elsevier.co.uk, or fax to: (+44) 1865 853333.

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone: (978) 7508400, fax: (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44) 20 7631 5555; fax: (+44) 20 7631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the publisher is required to store or use electronically any material contained in this journal, including any article or part of an article.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

Address permissions requests to: Elsevier Global Rights Department, at the mail, fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

Cover design: The cover design symbolizes the interdependent nature of the Quaternary sciences. The woolly mammoth represents the traditional image of the Quaternary Period and the emerging notions of long-term climate changes in the terrestrial realm during the recent geological record. The foraminifer *Elphidium crispum* represents coastal and marine sedimentary environments and the stone tool symbolizes the emergence of the genus *Homo* and human interactions in the natural environment. The dominance of yellow in the cover design represents the official geological colour denoting strata of the Quaternary Period on geological maps.

⊗ The paper used in this publication meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of paper).

Contents

SPECIAL ISSUE: The Coastal Shelf of the Mediterranean and Beyond: Corridor and Refugium for Human Populations in the Pleistocene

Introduction

- G. Bailey, J.S. Carrión, D.A. Fa, C. Finlayson, G. Finlayson and J. Rodríguez-Vidal:** The coastal shelf of the Mediterranean and beyond: Corridor and refugium for human populations in the Pleistocene 2095
- F. Rodríguez-Sánchez, R. Pérez-Barrales, F. Ojeda, P. Vargas and J. Arroyo:** The Strait of Gibraltar as a melting pot for plant biodiversity 2100
- J.S. Carrión, C. Finlayson, S. Fernández, G. Finlayson, E. Allué, J.A. López-Sáez, P. López-García, G. Gil-Romera, G. Bailey and P. González-Sampériz:** A coastal reservoir of biodiversity for Upper Pleistocene human populations: Palaeoecological investigations in Gorham's Cave (Gibraltar) in the context of the Iberian Peninsula 2118
- H.J. O'Regan:** The Iberian Peninsula – Corridor or cul-de-sac? Mammalian faunal change and possible routes of dispersal in the last 2 million years 2136
- G. Finlayson, C. Finlayson and J.M.R. Espejo:** Dynamics of a thermo-Mediterranean coastal environment – the Coto Doñana National Park 2145
- G.N. Bailey and N.C. Flemming:** Archaeology of the continental shelf: Marine resources, submerged landscapes and underwater archaeology 2153
- N. Bicho and J. Haws:** At the land's end: Marine resources and the importance of fluctuations in the coastline in the prehistoric hunter-gatherer economy of Portugal 2166
- M. Cortés-Sánchez, A. Morales-Muñiz, M.D. Simón-Vallejo, M.M. Bergadà-Zapata, A. Delgado-Huertas, P. López-García, J.A. López-Sáez, M.C. Lozano-Francisco, J.A. Riquelme-Cantal, E. Roselló-Izquierdo, A. Sánchez-Marco and J.L. Vera-Peláez:** Palaeoenvironmental and cultural dynamics of the coast of Málaga (Andalusia, Spain) during the Upper Pleistocene and Early Holocene 2176
- D.A. Fa:** Effects of tidal amplitude on intertidal resource availability and dispersal pressure in prehistoric human coastal populations: the Mediterranean–Atlantic transition 2194
- J. Ramos, D. Bernal, S. Domínguez-Bella, D. Calado, B. Ruiz, M.J. Gil, I. Clemente, J.J. Durán, E. Vijande and S. Chamorro:** The Benzú rockshelter: a Middle Palaeolithic site on the North African coast 2210
- F.J. Gracia, J. Rodríguez-Vidal, L.M. Cáceres, G. Belluomini, J. Benavente and C. Alonso:** Diapiric uplift of an MIS 3 marine deposit in SW Spain: Implications for Late Pleistocene sea level reconstruction and palaeogeography of the Strait of Gibraltar 2219

J.M. Erlandson, M.L. Moss and M. Des Lauriers: Life on the edge: early maritime cultures of the Pacific Coast of North America	2232
C. Finlayson: On the importance of coastal areas in the survival of Neanderthal populations during the Late Pleistocene	2246
J.J. Shea: Transitions or turnovers? Climatically-forced extinctions of <i>Homo sapiens</i> and Neanderthals in the East Mediterranean Levant	2253
